DELTEQ is one of the first local Systems Integrators established in Singapore, with a subsidiary in Petaling Jaya, Malaysia

DELTEQ started operations in 1992, when two ex- Hewlett Packard employees saw great opportunities in providing quality systems integration services in Singapore. In 2008, DELTEQ successes were of interest to Cavu Corp, a subsidiary of Singapore Exchange Mainboard listed company Si2i, and was successfully acquired afterwards by Cavu Corp.

Managed IT Solutions

At Delteq we believe “one size does not fits all.” We offer our clients IT relocation and migration services. For customers who are new to the digital domain we offer server and network management service. Our Database Administration and Data storage solutions are world class

System Integration

Delteq offers system integration services along with world class software solutions. We have strategic alliances with the world leaders of Hardware services. With Lenovo, HP, IBM Xseries & Dell Intel Hardware bestowing us with their trust we provide our customers with the latest hardware solutions.

Enterprise Business Application and Solution

We provide customized business applications for enterprise imaging and workflow. Our applications help you manage large volumes of information and operational content within your business.

OUR PARTNERS

**Hewlett Packard
Enterprise**

ORACLE®

Peremex is energetic about devising inventive approaches to convey savvy, needs-based optional enterprise frameworks, networks and maintenance solutions that helps its customers boost their Returns on IT speculations (RoIT). Peremex offers both new and refurbished frameworks, and system hardware for all your hardware prerequisites. It is made possible with the support from our global partnership with the world class computer vendors and IT outsourcing service providers.

Hardware support & Services

Peremex has alliances with some of the world's leading Hardware service providers. With the best in the field supporting us, we provide our customers with Hardware solutions that caters to their business needs in a cost effective manner.

Hardware Support Maintenance

We see our clients as our business partners and believe in life long relationships. Our experts are available round the clock to support you with the maintenance of the hardware solutions provided. We not only provide after delivery support but also regular upgradation of the systems if demanded.

Enterprise Hardware Maintenance

We offer single-point solutions to your annoying, costly hardware issues. Our Enterprise Hardware Maintenance solutions offer our customers a range of customizable Enterprise Hardware Support Services for various multi-vendor or multi-platform systems.

IT Consulting

Peremex provides not only hardware solutions but also software security and solutions. We also help our clients with IT relocation and Email migration. We also provide our customers with server and network management solutions.

Established in 2002, Centia gives a diverse scope of enterprise systems support services to meet the Informational Technology needs of our corporate clients. The services incorporated are hardware solutions, operating system services, system integration services, operational services and expert services. Coupling our huge range of contributions is our commitment to deliver the most elevated service level accessible in the business today. This has not just kept us in great stead in our associations with our clients also we have effectively increased the value of our clients' business.

Enterprise IT Support & Outsourcing

We offer one point solutions to your slow and less responsive software issues. Centia provides our customers a range of customizable solutions. If you are facing issue with the installation of softwares or while understanding the functionalities Centia s the solution. We offer solutions for all business types and sizes.

Server Support & Integration

Centia provides server support and integration for its clients. Add several workstations and still system runs smooth. We provide you with a server suited to your business size. With all softwares incorporated we also let you convert your data to the new server.

Database Management

We provide our customers with a well organised way to create, retrieve, update and manage data. With the best database management systems partnering with us we bring for our clients a world class solution that lets them focus more on their business and less on data management.

Firewall & Security

Not only do we provide business solutions but we also ensure you data is safe. We understand the importance of credibility in the market and provide our customers with firewall and security services that keeps your clients data safe and increases your loyal customer base.

Custom Software Development

We design software solutions that cater to the need of your business. With our custom software development services get software solutions designed uniquely to serve your business needs and help you excel in the domain.

Web Designing & Development

At Centia we provide website solutions that are not just attractive but actually fresh also. We help your business develop at soaring pace with our all around organized, profoundly modified and client driven web services.

MediaRing.com Inc. markets and offers telecommunication services. The organization was incorporated in 1998 and is situated in Fremont, California. MediaRing.com Inc. works as an auxiliary of Spice i2i Limited. The organisation is a popular choice among world leaders, because of fine services and advanced technologies involved with it.

MediaRing Talk

Our MediaRing Talk services lets our customers establish a business environment where they can connect with each other without telecalls.

Our MediaRing talk services lets you connect with your customers through messages and calls over the internet. We also provide JPEG and GIF sharing over the messages. You can also schedule your ads according to the time you want them to be displayed.
